DETAILED ACTION

Allowable Subject Matter

1. Claims 1-40 are allowed.
2. The following is an examiner's statement of reasons for allowance: U.S. Pat. No. 6,299,127 (Wilson) discloses a flush valve comprising a body (10), a pressure chamber (32), an inlet (12), an outlet (14), a piston (46), a refill orifice (30), a main seat (20), a relief valve (44), a fluid driven actuator (52), and a hydraulic bypass (75) but lacks a main valve seat having a plurality of fluid passages providing fluid communication from the inlet to the hydraulic bypass. U.S. Pat. No. 6,408,873 (Hall et al.) teach a flush valve having a valve body (10), a piston (26), a relief valve (46), and at least one fluid passage (66) on the piston that communicates between the inlet and the pressure chamber (60). However, there is no motivation to combine these references to add at least one fluid passage of Hall et al. to the flush valve of Wilson since the at least one fluid passage of Hall et al. is not on the main valve seat rather the at least one fluid passage is on the piston

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 3,778,023 (Billeter) discloses a flush valve having a solenoid actuator.
